

To all our dedicated customers and colleagues,

Aircrafters has some significant and exciting news to announce. We have a new partial owner! Tim Farrell has become a part of Aircrafters and will be assuming all of the administrative, sales, and marketing responsibilities. Dave Saylor will be focusing his time and energy on the shop floor and working on your airplanes.

I am originally from Oregon and have recently settled in the Monterrey Bay area. I'm an instrument rated private pilot with years of experience building Lancairs. I love experimental aviation and aviation in general. I have experience teaching and I look forward to helping Aircrafters spread it's knowledge about building and buying all kinds of experimental aircraft.

We look forward to having you back in our hanger. This year we will celebrate our 15 year anniversary, that makes us one of the oldest and most experienced builder's assistance and experimental aircraft maintenance shops in the world. Today we are still staffed 100% by A&P mechanics and Dave Saylor is our in house IA. We have a great relationship with the Sacramento FSDO and always assure compliance with the FAA's 50% rule. We make sure that every aspect of your build is quality, detailed and lasting.

As a new service, we are offering maintenance on Light Sport Aircraft, both experimental and certified, along with Rotax service. Today's Light Sport Aircraft utilize technology that is new to many shops, but old hand for us. We have been working with composites, advanced avionics and glass panels for over a decade, one reason that makes us the best shop around for LSAs. Considering an RV-12? Give us a call.

Feel free to drop by or drop a line anytime, I can't wait to meet you in person,

Tim Farrell
